BWHI TAKING PREVENTION TO THE PEOPLE

PAULA GREEN-SMITH, VP TRAINING AND TECHNICAL ASSISTANCE

LENEÉ REEDUS-CARSON, EDUCATION PROGRAM DIRECTOR, CHRONIC DISEASE MANAGEMENT

BLACK WOMEN'S
HEALTH IMPERATIVE

CHANGE YOUR LIFESTYLE.
CHANGE YOUR LIFE.

Our presentation highlights a few of the innovative approaches used, both as a grant recipient and program provider, to increase the availability of the program through training and capacity-building, communications, and our tailored digital program delivery.

High-Touch Coaching™

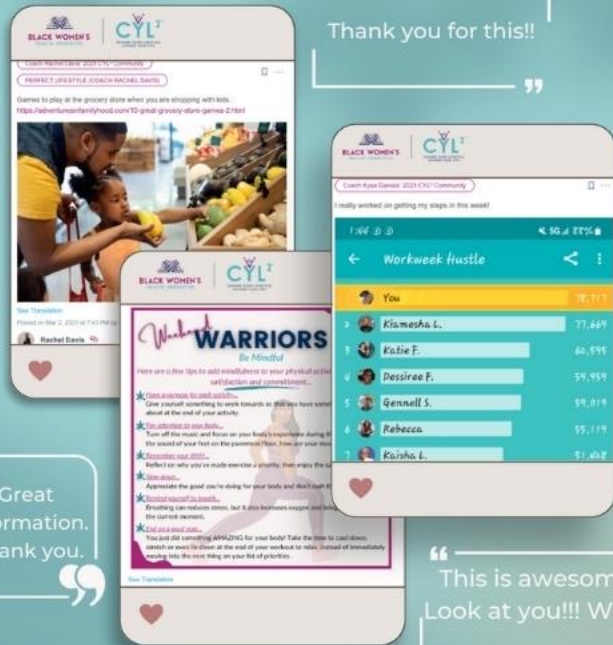

Our coaching model reflects our **understanding, value, and respect** for the lived experience and intersectionality of women of color and how those both influence thoughts, decisions, and behavior change.

Healthy Eating with Dish Diva

The Snack and Chat episode for April focused on strawberries. YUM! Tiffany and I both made sweet treats with a healthy twist. Let me know if you try any of them. Enjoy!

Reminder

Live Coach Session

Live Coach Session Reminder:

In this week's live session, you will meet with your lifestyle coach and fellow classmates to talk more about preventing Type 2 diabetes and making lifestyle changes.

Join Coach Lauryl: CYL² Lifestyle Change Program

Time: 1 PM ET / 12 PM CST / 10 AM PST

Join Zoom Meeting

Culturally Tailored Curriculum

BWHI adapted the PreventT2 curriculum and added 5 new modules, based on our feedback from Black women:

- Chronic Stress, Intersectionality, and Lived Experience
- Practice Self-Care for Life!
- Aging Like a Fine Wine: Achieving Weight Goals During Mid-Life
- More About Aging Like a Fine Wine: Hormones and Menopause
- What's Money Got to Do With It?

The Men's Room

Project Objective

The project objective is to increase the enrollment of Black men in the BWHI lifestyle change program by engaging them to adapt and culturally tailor the curriculum for themselves.

Additional Outcomes

- Increased awareness regarding various health issues affecting Black men
- Positive self-reported changes related to such variables as chronic stress/stressors, self-care, self-confidence, and social connectedness.
